## Feedback — Quiz 2

[Help Center](#)

You submitted this quiz on **Mon 11 May 2015 9:08 AM PDT**. You got a score of **6.00** out of **6.00**.

### Question 1

In the slidify YAML text. Changing the framework from `io2012` to `shower` does what?

Your Answer	Score	Explanation
<input checked="" type="radio"/> It changes the html5 framework thus changing the style of the slides.	✓ 1.00	
<input type="radio"/> It changes whether the document is self contained or requires being connected to the internet.		
<input type="radio"/> It changes the ability to display mathjax javascript rendering.		
<input type="radio"/> It changes nothing.		
Total	1.00 / 1.00	

### Question 2

You wrote R code in a slidify document as follows

```
```{r}
fit <- lm(y ~ x1 + x2 + x3)
summary(fit)
...```

```

If you want to hide the results of the `summary` statement (yet still have it run) what should you do?

Your Answer	Score	Explanation
<input type="radio"/> Comment the command as below but also use a bang symbol after the comment, as in <code>#! summary(fit)</code>		
<input checked="" type="radio"/> Add a <code>results = 'hide'</code> option in the <code>{r}</code> call of the code chunk	✓ 1.00	
<input type="radio"/> Add a <code>echo = FALSE</code> option in the <code>{r}</code> call of the code chunk		
<input type="radio"/> Comment out the command <code># summary(fit)</code>		
Total	1.00 / 1.00	

## Question 3

You wrote R code in a slidify document as follows

```
```{r}
fit <- lm(y ~ x1 + x2 + x3)
summary(fit)
```
```

If you want to display the results, but not the actual code, what should you do?

| Your Answer                                                                                                            | Score          | Explanation |
|------------------------------------------------------------------------------------------------------------------------|----------------|-------------|
| <input type="radio"/> Comment out the command <code># summary(fit)</code>                                              |                |             |
| <input type="radio"/> Comment the command, but use a bang symbol after the comment, as in <code>#! summary(fit)</code> |                |             |
| <input checked="" type="radio"/> Add a <code>echo = FALSE</code> option in the <code>{r}</code> call of the code chunk | ✓ 1.00         |             |
| <input type="radio"/> Add a <code>echo = TRUE</code> option in the <code>{r}</code> call of the code chunk             |                |             |
| Total                                                                                                                  | 1.00 /<br>1.00 |             |

## Question 4

R studio presentation tool does what?

| Your Answer                                                                                                                                                                                                                           | Score       | Explanation |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|-------------|
| <input type="radio"/> Creates a presentation that can only be run from within Rstudio.                                                                                                                                                |             |             |
| <input type="radio"/> Creates a power point presentation from a generalized markdown format having an extension Rpres.                                                                                                                |             |             |
| <input type="radio"/> Creates presentable R code from within presentations. However, it does not actually run the code.                                                                                                               |             |             |
| <input checked="" type="radio"/> Creates HTML5 slides using a generalized markdown format having an extention Rpres and creates reproducible presentations by embedding and running the R code from within the presentation document. | ✓ 1.00      |             |
| Total                                                                                                                                                                                                                                 | 1.00 / 1.00 |             |

## Question 5

In Rstudio presenter, if you do not want the code to be evaluated, what option do you need to add to the `{r}` options?

| Your Answer                                                | Score       | Explanation |
|------------------------------------------------------------|-------------|-------------|
| <input checked="" type="radio"/> <code>eval = FALSE</code> | ✓ 1.00      |             |
| <input type="radio"/> <code>results = 'hide'</code>        |             |             |
| <input type="radio"/> <code>run = FALSE</code>             |             |             |
| <input type="radio"/> <code>echo = FALSE</code>            |             |             |
| Total                                                      | 1.00 / 1.00 |             |

## Question 6

When presenting data analysis to a broad audience, which of the following should be done?

| Your Answer                                                                                 | Score                                                                                    | Explanation |
|---------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|-------------|
| <input checked="" type="radio"/> Make the figure axes readable.                             |  1.00 |             |
| <input type="radio"/> Show every analysis and method that was done.                         |                                                                                          |             |
| <input type="radio"/> Do not include figure captions.                                       |                                                                                          |             |
| <input type="radio"/> Present results in the chronological order in which it was performed. |                                                                                          |             |
| Total                                                                                       | 1.00 /<br>1.00                                                                           |             |
